### **Substance Use Disorder Director's Report October 2020**

- 1. 1915 (c) HCBS Waivers/Substance Use Disorder (SUD) Site Review:** MDHHS has communicated with the LRE that they will be conducting a full site review which will include: SUD, Children's Waiver Services, Habilitation Supports Program, and Waiver for Children with Serious Emotional Disturbance. The site review will be conducted October 19-December 4 remotely/desk review with CMH's and the LRE staff. The LRE and CMH's have been working diligently to collect the large amount of proof information required for this site visit. This week Friday, October 16<sup>th</sup>, the proofs need to be uploaded to the state website in order to meet the guidelines as required by MDHHS. Their staff will then start to review our materials for compliance. A full report of the findings will be available likely in early January of 2021.
- 2. Partnership for Success Grant (PFS)-** The PFS grant is a federal grant received by the Michigan Department of Health and Human Services, Office of Recovery Oriented Systems of Care (OROSC). The project seeks to build healthier communities and increase behavioral health service capacity by strengthening and enhancing community-level infrastructure through community coalitions that utilize the Strategic Planning Framework to address underage drinking and prescription drug misuse among persons age 12-25.

OROSC selected the counties of Mason, Oceana, and Muskegon to participate in this project based on priority data indicators. Attached you will find a document detailing the activities and an analysis of data trends for targeted indicators that took place during the five-years of the grant.

**Trends in Targeted Data Indicators:** The LRE established metrics to track changes in data related to priorities established by the PFS grant. **Highlights include:**

- ☐ **Underage Alcohol Use:** 14%↓ in lifetime use and a 34%↓ in recent alcohol use among high school students between 2014 and 2020 while statewide rates increased slightly.
- ☐ **Prescription Drug Misuse:** 40%↓ in recent misuse of prescription painkillers among high school between 2014 and 2020, and a 33%↓ decrease in recent misuse of any prescription medication between 2016 and 2020. Statewide data not available.
- ☐ **Opioid Overdose Deaths:** In 2015, the LRE PFS region rate of opioid overdose deaths (per 100,000 residents) was higher than statewide. The region's rate has since decreased while statewide rates have increased to greater than that of the region.
- ☐ **Opioid Prescribing:** 24%↓ in the rate of opioid prescriptions dispensed to residents in the LRE PFS region between 2015 and 2018. State-wide rates were continually lower than the region with slightly less improvement (21%↓).
