

Information Officer Report – March 2021

Summary:

1. MCIS Software: No updates at this time.

2. Planned Data Exchanges with Beacon Health Options:

With the finalization of the new LRE/Beacon contract, planning is now underway to prepare detailed implementation plans for the organizational changes to come and the IT infrastructure needed to support them.

3. FY20 data reporting to MDHHS:

Encounter reporting for FY20 is complete. Additional corrections may still come in as we finalize our data for the year end close and do FY20 financial year end reporting.

4. FY21 data reporting to MDHHS:

With the intense focus being given to FY20 data completeness, some CMHs are still showing notable lags in FY21 data submissions. First quarter professional encounters (October, November and December dates of service) should be substantially reported at this time. However, as can be seen in the encounter graphs attached, HealthWest and Ottawa CMH are substantially under-reported for that time period.

With FY21 encounter volumes significantly depressed, it is difficult to know whether the MDHHS BHTEDs completeness calculation for FY21 (generated on 03/02/2021) is truly meaningful for our region at this time or not (since encounters form the denominator for the completeness calculation). **Current FY21 BHTEDS completeness** stats are also included for your review under "Additional Details" below (on pages 2-3). It is noted that for the Mental Health BHTEDS measure, we are both below the 95 % standard and are also ranked 10 out of 10 among our PIHP peers. An internal LRE BHTEDS workgroup, (whose launch was already planned to collaboratively work through BHTEDS data quality and consistency issues) will be asked to also evaluate and address the low completeness measures.

5. FY20 Financial Year End Reporting and the new Encounter Quality Initiative (EQI) report: Lakeshore's CMHSPs are currently preparing final FY20 EQI reports for submission to LRE. LRE will then prepare and submit the regional set of final FY20 CMH/PIHP EQI reports to MDHHS by 3/31/2021. Around that same time, Milliman is expected to deliver their analysis of EQI-vs-Encounters discrepancies based on the "Units Only" EQI submitted in February. We will research and resolve issues that Milliman reports as material discrepancies to more accurately align our encounter data and our financial reports with how MDHHS/Milliman sees and uses the data in their data driven Medicaid rate setting process.

FY21 Financial reporting efforts will need to begin soon after FY20 has been submitted as the first (of 3) FY21 EQI reports (over October 2020 through January 2021) will be due in May.

Additional Details:

FY21 BHTEDS Completeness – per MDHHS (03/01/2021):

FY21 Mental Health BHTEDS (excludes "crisis only" episodes of care): [91.17 % → 91.47 % over the last month, +.30]
